

AVA is a compact and mountable unit that seamlessly integrates with all other RAD devices and provides an edge-to-edge 180° field of vision with advanced access control over gates and entries. As easy to install and scale as all RAD hardware, AVA deploys RAD's innovative artificial intelligence-based technologies to enhance an organization's situational awareness, communication, and control. AVA takes full advantage of the RAD Software Suite aimed at providing a comprehensive access control package that is ideal for storage yards, parking structures and lots, corporate campuses; anywhere that increased visibility is needed at a fraction of the cost.

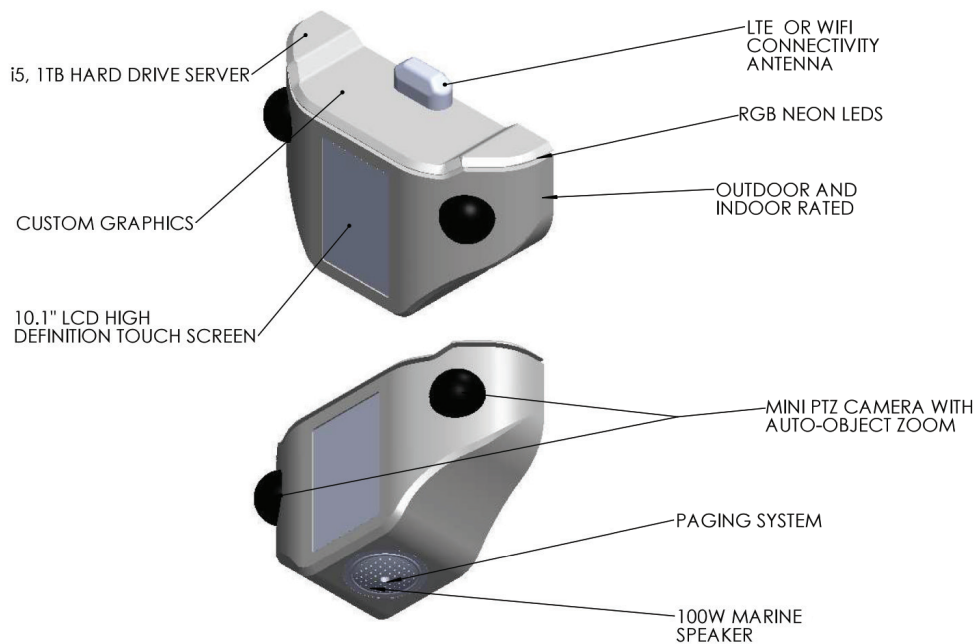

DO YOU HAVE INTELLIGENT ACCESS CONTROL 24/7?

AVA implements a comprehensive access package for increased control
